BD 890 MM (BROCHURE)

It represents Rabotti production tradition in a modern key. It features a 15kW motor and can be equipped with glass measuring tubes or electronic flowmeter. It allows customer to test in-line and distributor injection pumps including flow measurement, timing device testing, LDA regulation and so on.

Furthermore, it allows the installation of other Rabotti products for the testing of Common rail components and EUI/EUP.

Address: Via Capponi 13, 10148 Torino (TO), Italy

TECHNICAL SPECIFICATIONS

Dimensions:			
LxHxW	mm	1970x700x1790	
Weight	kg	900	
Motor:			
Engine power	kW	15	
Туре		Three-phase 4-pole	
Voltage	V	380	
Frequency	Hz	50	
Nominal Velocity	r/min	1460	
Nominal Torque (1450 rpm)	Nm	98	
Maximum Torque (1450 rpm)	Nm	274	
Nominal Current	A	29.2	
Electric Data:			
Electrical Socket		3P+N+GND	
Three phase input voltage	V	400± 10%	
Frequency	Hz	50/60	
		0 – 4000	
Speed	rpm		
External 12V power supply	A	6,3	
External 24V power supply Other Data:	A	5	
Wheelbase	m.m.	125	
ISO Drive Coupling	mm Ø mm	120	
Measurement Points	n°	120	
Test tube capacity	cm ³	45 & 150	
Test cube capacity Test oil tank	L	50	
Supply pump:	l l	30	
Low pressure (test oil)	l/min	3.2	
High pressure (test oil)	l/min	3.2	
Manometers:	1/111111	5,2	
Low pressure	bar	0 - 4	
High pressure	bar	0 - 60	
Pump internal pressure	bar	0 - 1,6	
Supply pump pressure	bar	0 - 16	
Thermometer	°C	0-80	
Heater	kW	2	
Control range of the temperature	°C	30 - 65	
Test Oil		DIN ISO 4113-1978C
